Reason: Planned install

Impact: The XML API sites will be entirely unavailable and you will not be able to connect to them at all for static data, price and allotment searches or booking requests.

During this install you can check for updates on our support site: <http://xml-support.gta-travel.com/LoginPage.asp> then clicking on the appropriate link under 'Service Information'.

Please accept our apologies for any inconvenience this unavailability of our XML API and XML call centre sites causes you.

Below you will find a list of all changes that will be made on this day that will affect your XML connection.

### **1. Enhancement to the <SearchChargeConditionsResponse>**

In the next few weeks we will for some of our clients introduce a pricing change that will offer reductions to the prices for some properties or destinations if bookings are being placed a long time in advance of the travel dates. For these bookings amendments will be restricted and in order to advise you in advance of these restrictions some new parameters will be returned with the <SearchChargeConditionsResponse> if applicable.

If you are concerned that you are unable to handle this enhancement without prior testing please contact us to ensure that this new parameter is not being returned to you until you have checked and changed your code accordingly. Please see the attached document for further information about this.

If you would like to know whether this pricing change will apply to you please contact our sales department who will be happy to discuss this with you in more detail.
